

# Sun Trust – Cocoa, FL

## Sun Trust Banks in Florida

Several branches of Sun Trust Banks in Florida were built using the signature style created by Gensler. The Ceramitex®-Sintered Ceramic Facade System was an excellent choice for ease of installation as well as the durability and graffiti-proof nature of the surface in a high traffic area. In addition to the standard North American testing, the Ceramitex system has achieved: Florida Product Approval FL26341-R0 (Approved for use inside HVHZ - High Velocity Hurricane Zone) and Miami-Dade County, Florida NOA No. 16-1004.05.

Project City: Cocoa, FL

Products: Ceramitex®

Industry: Commercial

Square Footage: Ceramitex® 4,566 sq.ft.

Architect: Gensler

Year Built: 2017

## The Architect

Gensler is widely recognized as the world's leading collaborative design firm, not just the largest. They offer the design industry's deepest bench of expertise, matched with experience gained by working with their clients across the global economy.

They say: *Facades are no longer for weather protection only; they are an integral part of a strategy for reducing energy use and increasing human comfort and amenity. New materials will also reduce the weight of facades while improving their performance.*

## 360° Advantage

Having multiple Sun Trust locations, it was important to have consistency between the projects. Not only because there were different trades installing the material on each job site, but also because the designs needed to parallel each other in order to ensure the image program was unaltered.

The Elemex project management team provided the optimization, coordination, and facilitation of the projects.
